Dear Kelly Restoration Advisory Board Members

The following is an action items report for the 12 September 2006 Kelly Restoration Advisory Board (RAB) "Special RAB" meeting.

*1. Mr. Silvas requested consideration be given to people who are not within the affected area if there is not sufficient interest from people within the affected area to serve on the Kelly RAB.*

This comment was addressed in the preamble to the Final Rule. The Final RAB Rule did not incorporate this comment because membership is restricted to those individuals that live or work in the affected communities. However, RAB meetings are open to all for participation.

*2. Mr. Quintanilla and Ms. LaGrange suggested the Kelly RAB rescind its previous definition of the affected area and open eligibility up to the entire city*

As addressed in Question 1, the Final RAB Rule does not permit RAB membership to extend to individuals who do not live or work in the affected communities.

*3. Mr. Garcia made a motion for SAMHD to provide him with information on who funded the air monitors, where they put them, and how they're functioning so that he can take that data to the congressional delegation and find out why the Air Force didn't fund it*

All environmental documents placed in the cochair library are available for review by the Kelly RAB and placed in the library following each meeting. As discussed previously, many of the documents placed in the library are correspondences that do not require executive summaries. As discussed during the 28 June 2006, Executive Committee meeting, the AFRPA will provide the document list with descriptions on the slides and handouts to facilitate RAB member understanding of the documents.

Thank you for your continued interest in the Kelly Restoration Advisory Board.

Sincerely

ADAM G. ANTWINE  
Senior Representative
